Summary:

Motivated and detail-oriented software developing including software testing with a B-Tech in Information Technology and hands on knowledge in full-stack web development (React, Python, MySQL) to build an interactive webpage and test automation (Selenium, TestNG, Cucumber). Seeking a Software Engineer role to contribute to impactful, production-grade software from day one.

Internship Experience:

Java Intern

- Phoenix Softech – Madurai **Jul 2025 – Aug 2025**
 - Completed a Java internship exposure to Core Java, OOP principles.
-

Education:

Bharath Niketan Engineering College - Affiliated by Anna University

- B - Tech in Information Technology with (CGPA 8.0) - **2022 – 2026**
-

Certifications:

- Python with MySQL (Besant Technologies) **Feb 2026 – May 2026**
 - Software Testing with Automation & Manual (Besant Technologies) **Feb 2026 - Apr 2026**
 - JavaScript with React JS (Uniq Technologies) **Apr 2026 - May 2026**
-

Technical Skills:

Frontend Developer	HTML, CSS, React.js — Responsive UI, Component-Based Architecture
Backend Developer	Python — RESTful APIs, Middleware, Authentication
Software Testing	Selenium (Java) — TestNG, Cucumber, POM framework, Manual testing
Databases	MySQL — Joins, CRUD Operations, Schema Design
Designing	Figma — Prototyping, Wireframing, Responsive Design
Dev Tools	VS Code, PyCharm, Eclipse, MySQL Workbench, Git, GitHub
Methodologies	Agile, SDLC, STLC, Black-Box Testing, Bug Life Cycle, JIRA

Experience:

Project 1:

Completed as Final year project - A Multi-Layer Image Puzzle Framework for Secure Hidden Data Transmission.

- Implemented LSB-based steganography for secure data embedding.
- Designed randomized image puzzle segmentation for added security.

- Applied ECC encryption for lightweight and strong cryptographic protection.
 - Enabled secure data transmission over untrusted networks.
 - Ensured lossless data recovery and image reconstruction.
 - Improved resistance against cyber threats and data interception.
-

Project 2:

Sample - Demo application for software testing

- Experience in Test Automation using Selenium WebDriver with sample demo application.
 - Experience in creating project from scratch with Maven project including Page Object model (POM).
 - Experience in Data Driven, Keyword Driven, Hybrid driven TestNG, Test Data Driven and BDD(Cucumber), POM framework.
 - Knowledge of Functional testing – STLC, Black box testing, bug life cycle.
 - Knowledge in Agile methodology and JIRA.
 - Experience in different type of web Element, and other common methods of selenium like switching Tab, Windows, Alerts and Waits.
 - Implemented TDD using POI dependency and usage of Extent Reports for report management.
 - Knowledge in Test case, Test scenario and Test data creation.
-
